

Assessing student religious knowledge

The purpose of this exercise is to locate gaps in student knowledge about the Catholic Faith and backfill those gaps, supporting students to find a connection to their religious education.

What do you know about your students, their beliefs, their background and their knowledge of Catholicism?	What do you want to know more about?	How are you going to find this out? How are you going to fill the gaps in their knowledge, while still fulfilling the requirements of your school work program or scope and sequence. How are you going to keep them engaged while you do that?

Assessing student religious knowledge

For Students:

What do you know about Catholicism?	What do you want to know more about?	How are you going to find that out? Does it have to be in the RE classroom, or can you find your answers elsewhere?
